

Nevada Childhood Lead Poisoning Prevention Program (NvCLPPP)

The **Nevada Childhood Lead Poisoning Prevention Program**, in partnership with the **Nevada Public Health Foundation**, is dedicated to protecting the health and well-being of children by educating families and service providers on the effects of lead poisoning from older homes and the items we bring into our homes.

NvCLPPP aims to:

- Increase blood lead testing in Nevada
- Link children exposed to lead to services
- Improve methods of surveillance
- Provide education about lead exposure to families, medical providers, and community partners
- Stay up-to-date and disseminate the latest research on lead poisoning prevention and the effects of lead poisoning

We are committed to:

INCREASE

the health and safety of Nevada's children by working with our community partners and health districts across the state

WORK

with a broad variety of organizations focused on health, family support, housing, maternal and child wellness, and early childhood education

SUPPORT

keeping kids and families safe from lead and other potential hazards within the home by providing educational workshops to families and community partners

PROVIDE

brief educational workshops to medical providers about the latest research and changes that may affect their practice

NvCLPPP is part of the Nevada Institute for Children's Research and Policy at the UNLV School of Public Health.
